Hi David,

Thank you again for all of your help arranging and participating in yesterday's meeting. I feel it was beneficial to all parties and was certainly well attended!

In addition to the slides I just sent out, I did also want to pass along the final attendee list – please see attached. These are the names that were shown in the Skype Webinar interface (see the second tab). Unfortunately, I was not able to get an email address for everyone that logged on but hopefully others will forward the slides to anyone I missed.

I did not distribute this list to all of the attendees but can if you feel it would be beneficial. Obviously, there are still some gaps to be filled in.

Thanks again,
-Rebecca

Subject: RE: CES Mendota EPA Class VI UIC Permit Application KickOff Meeting

Dear all,

I would personally like to thank everyone for attending yesterday's webinar introducing Clean Energy Systems' Mendota Carbon Negative Energy project. We believe our "BioCCS" process offers several benefits to California such as providing solutions for waste management, clean transportation fuels, and cleaner air for the Central Valley, and look forward to working with each of your agencies in the coming months to evaluate and permit the site for the safe and permanent storage of CO₂.

As requested, please find attached a copy of the slides that were presented by both Clean Energy Systems and Schlumberger, including the highlights of our Pre-Construction EPA Class VI UIC Permit Application.

Also, Lex Mitchell from CARB asked that I pass along his slides as well – see attached. Note the full ARB workshop presentation is available here - carbon capture and sequestration (CCS) is covered from slides 32 to 49. Of course, if you would like more information on the State's CCS protocol, you can check out their recently updated website here.

If you have any questions, please don't hesitate to reach out to me or David Albright at EPA. As discussed, we will be reaching out to each agency individually in the coming months as we progress through project development.

Best Regards,
-Rebecca
